Exploring new ways to gain insights into cancer

From omics and imaging data to new digital health information, we have entered the era of multidimensional clinical problems in Oncology. These are no longer solvable by small exclusive teams. This talk will explore new ways to work together, share data and insights. It will highlight specific examples in breast cancer, colon cancer, brain tumors and AML.

**Kaare Norum Auditorium,
Oslo Cancer Cluster Innovation Park
Entrance 2B – Montebello
Ullernchausseen 64/66**

10. March – 14:00 – 15:00
