

Institute seminars

Autumn semester 2022

Date	Speaker	Department	Title
7. September	Sascha Pust	Dept. of Molecular Cell Biology	Protein transport during the late steps of mitosis - ALIX recruitment to the midbody
21. September	Susanne Lorenz	Dept. of Core Facilities	High-throughput multi-omics. Current and future technologies to study cancer, from tissue to single-cells
12. October	Anne Hansen Ree	Akershus University Hospital, University of Oslo	Shaping anti-tumor immunity in advanced colorectal cancer
26. October	Nikolai Engedal	Dept. of Tumor Biology	Mammalian ATG8 proteins and the role of autophagy in cancer formation and progression
16. November	Asta Juzeniene	Dept. of Radiation Biology	Targeted alpha radiopharmaceuticals for the treatment of disseminated cancers
30. November	Åslaug Helland and Hege Russnes	Dept. of Cancer Genetics	Precision Cancer Medicine - development and status in InPRED and IMPRESS-Norway
7. December	Mouldy Sioud	Dept. of Cancer Immunology	Mining for antibodies to cell surface proteins
14. December	Kjetil Taskén	Institute head	End-year status @ICR
