

<b>Date</b>	<b>SPEAKER</b>	<b>Title</b>
14 January	Geir Kjetil Sandve and Eivind Hovig Department of Tumor Biology	Massive statistical analyses of genomic data
21 January	Erlend B Smeland	Informasjon fra Institutttrådet (in Norwegian)
4 February	Svein Dueland Department of Oncology	Curative treatment in advanced colo-rectal cancer
18 February	Marta Nyakas Clinical Research Unit at the Department of Clinical Cancer Research	Presentation of the Clinical Trial Unit
4 March	Guro Lind Department of Cancer Prevention	Identification of novel biomarkers for early detection of colorectal tumors
11 March	Therese Sørlie Department of Genetics	Dissecting breast cancer by genome-wide molecular profiling
25 March	Jørgen Wesche Department of Biochemistry	Intracellular transport of fibroblast growth factors (FGFs) and their receptors
1 April	Alina C. Porojnicu Department of Radiation Biology	Solar radiation, vitamin D and cancer incidence and mortality in Norway
15 April	a. Øystein Fodstad b. Anne-Lise Børresen-Dale	Informasjon fra Institutttrådet (in Norwegian) Cancer research in Europe; organization, collaborations and funding possibilities
22 April	Barbara Guinn University of Southampton	Leukaemia associated antigens: new markers of survival and targets for the immunotherapy of acute myeloid leukaemia
29 April	Leonardo Meza-Zepeda Department of Tumor Biology	Integrated genomic analysis of human osteosarcomas
13 May	Ingvild Odsbu Department of Cell Biology	Protein-DNA interactions in the regulation of DNA replication
27 May	Mouldy Sioud Department of Immunology	RNA interference: Separation of unwanted effects from gene silencing and new strategies for breaking immune tolerance to tumour cells
10 Juni	Øystein Fodstad	Informasjon fra Institutttrådet (in Norwegian)
